

Tables

Table 1. Summary of cell numbers in all ganglion cell types at P20-22 of rabbit retinas

Cell Type	Control		Dark		Sum		Rockhill et al., 2002	
	no.	%	no.	%	no.	%	no.	%
Frequently encountered								
G1	22	19.13	18	11.32	40	14.6	55	17.92
G4 ON	1	0.87	9	5.66	10	3.65	29	9.45
G4 OFF	16	13.91	9	5.66	25	9.12	34	11.07
G5	6	5.22	9	5.66	15	5.47	20	6.51
G7	20	17.39	30	18.87	50	18.25	48	15.64
G9	6	5.22	10	6.29	16	5.84	8	2.61
G10	8	6.96	22	13.84	30	10.95	12	3.91
G11 ON	6	5.22	7	4.4	13	4.74	2	0.65
G11 OFF	9	7.83	16	10.06	25	9.12	2	0.65
Others								
G2	0	0	1	0.63	1	0.36	36	11.73
G3	2	1.74	2	1.26	4	1.46	34	11.07
G6	0	0	0	0	0	0	17	5.54
G8	0	0	3	1.89	3	1.09	10	3.26
OR type	10	8.7	10	6.29	20	7.3		
Bi-GC	3	2.61	2	1.26	5	1.82		
unknown	6	5.22	11	6.92	17	6.2		
Total	115	100	159	100	274	100	307	100

Values in “Rockhill et al., 2002” are cell number and predicted cell density of each cell

type in adult rabbit retinas from Rockhill et al. (2002). G4 ON ganglion cells are included in the “Frequently encountered” group as a counterpart of G4 OFF ganglion cells, even though there is only cell identified in this study.
