

# TABLE OF CONTENTS

摘 要.....	i
Abstract.....	ii
1. INTRODUCTION.....	1
1.1 Classical receptive field .....	1
1.2 Motion surround inhibition .....	2
1.3 Beyond the classical – peripheral effect .....	3
1.4 Direction selective ganglion cell .....	4
1.5 What the eye tells the brain.....	5
1.6 Questions and brief summary .....	6
2. MATERIALS AND METHODS.....	7
2.1 Retina preparation.....	7
2.2 Visual stimuli .....	8
2.3 Electrophysiology .....	9
2.4 Experimental design .....	9
2.5 Data analysis.....	12
3. RESULTS.....	13
3.1 DSGCs have dynamic responses to motion background context .....	13
3.2 Neither the random stimulus sequence nor the same background context patterns alters the cell's response .....	15
3.3 Spatial scale can alter the response of DSGCs .....	16
3.4 Surround excitation may come from the outer receptive field .....	17
3.5 Motion coherence does not affect the center response.....	18
4. DISCUSSIONS.....	19
4.1 DSGCs have various responses under different motion background context .....	19
4.2 Surround inhibition vs. surround excitation .....	19
4.3 Living in a real world .....	21
5. REFERENCES.....	23
6. FIGURES.....	26
Figure 1. Spatial coverage stimulus used in this study. ....	26
Figure 2. Immediate surround extending areas. ....	28
Figure 3. Different spatial scale in the surround.....	29
Figure 4. DSGC basic properties.....	30
Figure 5. Three different plots present the cell's response.....	32
Figure 6. Three different types of DSGCs classified according to the response	

	curve to a spatial coverage stimulus.....	33
<b>Table 1.</b>	<b>Comparison among three distinct cell types.....</b>	<b>35</b>
<b>Figure 7.</b>	<b>Type I and type III can be separated by Trend Index. ....</b>	<b>36</b>
<b>Figure 8.</b>	<b>Same test or random sequence does not affect the response curve when compared to a norm.....</b>	<b>37</b>
<b>Figure 9.</b>	<b>Spatial scale alters the response of DSGCs. ....</b>	<b>39</b>
<b>Figure 10.</b>	<b>Different types of DSGC respond to different spatially extending surround.....</b>	<b>40</b>
<b>Figure 11.</b>	<b>Motion coherence does not affect the center response.....</b>	<b>41</b>
<b>Figure 12.</b>	<b>An Excitation-Inhibition competing model for explaining background contextual effect of the DSGC . ....</b>	<b>42</b>
