<b>1. INTRODUCTION</b>	<b>1</b>
1.1 Motivation	1
1.2 Literature Survey	2
1.3 Contributions of the Dissertation	5
1.4 Outline of the Contents	7
<b>2. A NOVEL TORQUE CONTROL STRATEGY FOR IPMSM DRIVES</b>	<b>10</b>
2.1 Introduction	10
2.2 Mathematical Model of an IPMSM	11
2.3 Optimization of the Torque Constant	13
2.4 Implementation of the Proposed Linear Torque Control Strategy	19
<b>3. EXTENSION OF THE PROPOSED LTC TO THE FIELD WEAKENING RANGE</b>	<b>27</b>
3.1 Introduction	27
3.2 The Proposed Field Weakening Control	28
3.3 Implementation of the Proposed Control Strategy	34
3.4 Experimental Results	40

<b>4. THE PROPOSED LTC WITH COPPER LOSS MINIMIZATION</b>	<b>45</b>
4.1 Introduction	45
4.2 The Proposed Linear Maximum Torque Per Ampere (LMTPA) Control—Constant Torque Limit Region	45
4.3 Extension of the Proposed LMTPA to the Field Weakening Region	50
4.4 Implementation and Experimental Results of the Proposed LMTPA Control	57
<b>5. CONSIDERATION OF THE MAGNETIC SATURATION EFFECT ON THE     PROPOSED LTC</b>	<b>70</b>
5.1 Introduction	70
5.2 Saturated Model of an IPMSM	71
5.3 The Proposed Linear Maximum Torque Per Ampere Control Considering Magnetic Saturation	74
5.3.1 Constant Torque Limit Region	74
5.3.2 Partial Field Weakening Region and Full Field Weakening Region	79
5.4 Implementation and Experimental Results	86
<b>6. CONCLUSIONS</b>	<b>107</b>

## LIST OF FIGURES

Fig. 2.1. The d- and q- axis dynamic equivalent circuits of an IPMSM in the rotor reference frame.-----	12
Fig. 2.2. The maximum torque limit to speed profiles for $i_{ds} = 0$ control and the proposed LTC for three different IPMSMs.	
(a) IPMSM A of Table 2.1.-----	17
(b) IPMSM B of Table 2.1. -----	17
(c) IPMSM C of Table 2.1. -----	18
Fig. 2.3. Trajectories of the proposed LTC and $i_{ds} = 0$ control as well as the voltage and current limits on $i_{ds} - i_{qs}$ plane for the tested IPMSM. -----	20
Fig. 2.4. An implementation block diagram of the proposed LTC strategy.-----	21
Fig. 2.5. Experimental results of $i_{ds}$ , $i_{qs}$ , and the speed responses for $i_{ds} = 0$ control.-----	23
Fig. 2.6. Experimental results of $i_{ds}$ , $i_{qs}$ , and the speed responses for the proposed LTC.---	23
Fig. 2.7. Experimental results of $i_{ds}$ , $i_{qs}$ , and the speed responses for $i_{ds} = 0$ control.-----	24
Fig. 2.8. Experimental results of $i_{ds}$ , $i_{qs}$ , and the speed responses for the proposed LTC.---	25
Fig. 2.9. Experimental results of phase-a current and the speed responses corresponding to Fig. 2.7.-----	25
Fig. 2.10. Experimental results of phase-a current and the speed responses corresponding to Fig. 2.8. -----	26
Fig. 3.1. The trajectories of (2.20), the current limit curve, and five voltage limit curves on $i_{ds} - i_{qs}$ plane for a sample IPMSM. -----	29
Fig. 3.2. Illustration of a maximum torque limit to speed curve and three speed regions for a prototype IPMSM designed in [67].-----	30

Fig. 3.3. Graphical illustration of the boundary current amplitude to motor speed curve for $\omega_{rm} \leq \omega_r \leq \omega_{rC}$ -----	31
Fig. 3.4. Block diagram of the proposed speed control system for an IPMSM drive.-----	34
Fig. 3.5. Illustration of the maximum line current amplitude to motor speed curve for $0 \leq \omega_r \leq \omega_{rE}$ -----	36
Fig. 3.6. The flowchart of the control mode detector corresponding to Fig. 3.4.-----	38
Fig. 3.7. Experimental results of $i_{ds}$ , $i_{qs}$ , and motor speed responses for the proposed control strategy in the partial field weakening region under lighter load.-----	41
Fig. 3.8. Experimental results of $i_{ds}$ , $i_{qs}$ , and motor speed responses for the proposed control strategy in the partial field weakening region under heavier load.-----	43
Fig. 3.9. Experimental results of $i_{ds}$ , $i_{qs}$ , and motor speed responses for the proposed control strategy in the full field weakening region.-----	44
Fig. 4.1. The d- and q- axis steady state equivalent circuits in the rotor reference frame of an IPMSM.-----	46
Fig. 4.2. The trajectories of (4.1), the current limit curve, one constant torque curve, and five voltage limit curves on $i_{ds}$ - $i_{qs}$ plane for an IPMSM.-----	50
Fig. 4.3. Graphical illustration of the virtual control bound to motor speed curve for $\omega_{rM} \leq \omega_r \leq \omega_{rC}$ -----	54
Fig. 4.4. Illustration of the maximum torque limit to motor speed curve and three operation regions for the proposed LMTPA control.-----	54
Fig. 4.5. Block diagram of the developed IPMSM drive system.-----	58
Fig. 4.6. The flowchart of the current commands calculator as reference to Fig. 4.5.-----	61
Fig. 4.7. Experimental results of $i_{ds}$ , $i_{qs}$ , and motor speed responses for the proposed control in the partial field weakening region under lighter load.-----	63

Fig. 4.8. Experimental results of $i_{ds}$ , $i_{qs}$ , and motor speed responses for the proposed control in the partial field weakening region under heavier load.	64
Fig. 4.9. Experimental results of $i_{ds}$ , $i_{qs}$ , and motor speed responses for the proposed control in the full field weakening region.	65
Fig. 4.10. The $i_{ds} - i_{qs}$ plot corresponding to Fig. 4.9.	65
Fig. 4.11. Experimental results of $i_{ds}$ , $i_{qs}$ , and motor speed responses by the proposed LMTPA control.	66
Fig. 4.12. The waveforms of the phase-a current response and the speed response corresponding to Fig. 4.11.	66
Fig. 4.13. The steady state waveform of phase-a current corresponding to Fig. 4.12.	67
Fig. 4.14. Experimental results of $i_{ds}$ , $i_{qs}$ , and motor speed responses by the LTC.	68
Fig. 4.15. The waveforms of the phase-a current response and the speed response corresponding to Fig. 4.14.	69
Fig. 4.16. The steady state waveform of phase-a current corresponding to Fig. 4.15.	69
Fig. 5.1. The measured $\lambda_{qs}$ to $i_{qs}$ points and the corresponding fitted curve of $\lambda_{qs}$ .	73
Fig. 5.2. The trajectories of $i_{ds}^* \sim u^*$ and $i_{qs}^* \sim u^*$ adopted in the constant torque limit region for the tested IPMSM.	78
Fig. 5.3. The trajectories of (5.15), the current limit curve, one constant torque curve, and five voltage limit curves on $i_{ds} - i_{qs}$ plane for the tested IPMSM.	79
Fig. 5.4. Graphical illustration of the virtual control bound to motor speed curve for the tested IPMSM.	82
Fig. 5.5. Illustration of the maximum torque limit to motor speed curve and three operation regions for the tested IPMSM.	83
Fig. 5.6. Block diagram of the developed IPMSM drive system.	87
Fig. 5.7. Illustration of the adaptive upper bound to motor speed curve for the tested IPMSM.	88
Fig. 5.8. The flowchart of the current commands calculator in Fig. 5.6.	90

Fig. 5.9. Circuit configuration of the three phase voltage source inverter.	91
Fig. 5.10. Six gate driver circuits of the inverter.	92
Fig. 5.11. The level-adjustment circuits of $i_{as}$ and $i_{bs}$ .	93
Fig. 5.12. Picture of a prototype of the IPMSM drive system.	94
Fig. 5.13. A rotor cross section view of the tested IPMSM.	94
Fig. 5.14. Experimental results of $i_{ds}$ , $i_{qs}$ , and motor speed responses within the constant torque limit region without considering magnetic saturation.	95
Fig. 5.15. The waveforms of the phase-a current response and the speed response corresponding to Fig. 5.14	96
Fig. 5.16. The steady state waveform of phase-a current corresponding to Fig. 5.15.	96
Fig. 5.17. Experimental results of $i_{ds}$ , $i_{qs}$ , and motor speed responses within the constant torque limit region with consideration of magnetic saturation.	97
Fig. 5.18. The waveforms of the phase-a current response and the speed response corresponding to Fig. 5.17.	98
Fig. 5.19. The steady state waveform of phase-a current corresponding to Fig. 5.18.	98
Fig. 5.20. Experimental results of $i_{ds}$ , $i_{qs}$ , and motor speed responses while accelerating toward the partial field weakening region without considering magnetic saturation.	100
Fig. 5.21. Experimental results of $i_{ds}$ , $i_{qs}$ , and motor speed responses while accelerating toward the partial field weakening region with considering magnetic saturation.	100
Fig. 5.22. The waveforms of the phase-a current response and the speed response while accelerating toward the partial field weakening region with heavier load and without considering magnetic saturation.	101
Fig. 5.23. The steady state waveform of phase-a current corresponding to Fig. 5.22.	101

Fig. 5.24. The waveforms of the phase-a current response and the speed response while accelerating toward the partial field weakening region with heavier load and considering magnetic saturation.-----	102
Fig. 5.25. The steady state waveform of phase-a current corresponding to Fig. 5.24.-----	102
Fig. 5.26. Experimental results of $i_{ds}$ , $i_{qs}$ , and motor speed responses while accelerating toward the full field weakening region without considering magnetic saturation. -----	104
Fig. 5.27. Experimental results of $i_{ds}$ , $i_{qs}$ , and motor speed responses while accelerating toward the full field weakening region with considering magnetic saturation. -----	104
Fig. 5.28. The waveforms of the phase-a current response and the speed response corresponding to Fig. 5.26.-----	105
Fig. 5.29. The steady state waveform of the phase-a current corresponding to Fig. 5.28.--	105
Fig. 5.30. The waveforms of the phase-a current response and the speed response corresponding to Fig. 5.27.-----	106
Fig. 5.31. The steady state waveform of the phase-a current corresponding to Fig. 5.30.--	106

## LIST OF TABLES

Table 2.1. IPMSM parameters and some inverter ratings-----	16
Table 2.2. Summary of some important data for three motor drives of Table 2.1.-----	18
Table 5.1. The Tested IPMSM Parameters and Inverter Ratings.-----	74
