

Acknowledgements

“Tsing Hua” - the name I’m proud of. It is not only the name of my graduate school but also my Mother’s name. First of all, I thank to my parents and family for their love and encouragement from childhood.

A tremendous amount of appreciation goes out to my esteemed advisor, Prof. Nen-Fu Huang, for his patient with advice and mentoring. He has cheerfully and skillfully guided my research in several insightful discussions.

Thanks to my friends for their enormous amount of assistance. Thanks as well to the members in High-Speed-Network Laboratory for cheerful student life. Finally, I wish to fully acknowledge and return the love and support of my girl friend, Kuan-Juan, and I dedicate this delight to her.
